

## **4B Classroom News May 21st to May 25<sup>th</sup>**

**We are winding down in many areas, therefore, this will be the last Friday note of the year. I hope it has been helpful in keeping you informed about what was happening with your child this year. Thanks so much to so many of you who regularly looked for it each week and used it to keep on top of fourth grade events, projects, homework, and quizzes.**

**4B Math:** We finished up our work with rates and unit prices and used grocery circulars to see the practical application of what we learned. We also reviewed symmetry and geometry concepts with a quilt activity. Remember to practice all basic facts for speed and accuracy. It will make a huge difference down the road in math!

**Language Arts:** Our selection this week was an informational narrative about the Venus Flytrap. We learned many interesting facts about carnivorous plants. We also learned that an interview can be used as an informational narrative. The class worked with partners to develop their own interview questions for the story.

**Writing:** We started the week learning about prepositions and objects of prepositions. Grammar work can be a challenge! Later we worked on creating summer T-shirts and writing about summer plans.

**Science/Social Studies:** Please continue checking assignment notebooks for homework, quizzes or tests in these two areas. At this point in the year it is your child's responsibility to be writing it down.

**There have been several communications stating that the last day of student attendance is Monday, June 11<sup>th</sup>. Students who are not here that day will receive report cards in the mail. They can not be sent out in advance.**

**Field Day is Monday June 4<sup>th</sup>. Additional information will be sent home about events that day.**

**Week of May 28, 2007:**

**Monday: No School Memorial Day Holiday**
